-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10/16/2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I. Claims 1-8, drawn to an electronic transaction recording system as an apparatus to accumulating data from printer devices, classified in class 705, subclass 40

Invention II. Claim 9-14, drawn to an electronic transaction recording system also an apparatus accumulating data from printer devices including a mobile access unit with content to be printed to authorize billing system, classified in class 705, subclass 40

Invention III. Claims 15-20, drawn to a method for electronically recording transactions performed as process on at least one predetermined printer device, coupled to a mobile access unit to transmit the content for generating cost accounting for billing manager, classified in class 705, subclass 40

2. Inventions I and III are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case data base for storing user's account information, printer device and mobile access unit working as apparatus can work with other process system like banking by hand or on line and printing/mobile, direct use by hand. Invention III recites

Art Unit: 3609

a method of electronically recording transaction process working in banking /investment companies by hand or automatically with other materials like ATM than the mentioned apparatus like data store, printers or mobile access units.

3. Inventions II and III are also related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case data base for storing user's account information, printer device and mobile access unit working as apparatus can work with other process system like banking by hand or on line and printing/mobile, direct use by hand. Invention III recites a method of electronically recording transaction process working in banking /investment companies by hand or automatically with other materials like ATM than the mentioned apparatus like data store, printers or mobile access units.

4. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination of the system comprising the plurality of printer devices with mobile access unit, billing manager for the system. The subcombination has separate utility such as database associated with the accounting of usage.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohamed Ali whose telephone number is not applicable. The examiner can normally be reached on 7-30 to 5.00.
